I'm a software engineer who desires to create visually compelling, sophisticated, and efficient software. I always learn new methods to optimize and produce more efficient code from constructive criticism. I strive for a competitive programming position where I can use my problem-solving, adaptability, and resourcefulness abilities.

EDUCATION

BA(Hons) Game Development: Programming | Falmouth University

SKILLS & SOFTWARE

PHP
C++ & C#
JavaScript
TypeScript

SQL
Agile development
Unreal Engine & Unity
Python

Git
React
Next.js
Node.js

EXPERIENCE

WEB DEVELOPER

Warp Design | Ashford - Remote

JULY 2025 – PRESENT

- Developed and service a fully automated shipping system sending orders to warehouses globally hosted on the Google Cloud Platform with a React frontend.
- Shipped 10+ web apps with a fully integrated CI/CD pipeline for amendments and security updates.
- Maintained and upgraded 5+ legacy codebases and projects.

SOFTWARE QUALITY ASSURANCE

Royal Yachting Association (RYA) | Southampton

FEB 2025 – JULY 2025

- Rigorously tested, exploited, analyzed and documented in-development sites through Umbraco.
- Created Python scripts to Automate web testing via Selenium.
- Discovered and reported 40+ bugs and inconsistencies within a few weeks on Azure DevOps.

PROJECTS

PORTFOLIO

Next.js | TypeScript | [Project Details](#)

JAN 2025 – PRESENT

- Produced a noteworthy portfolio showcasing my major projects.
- Responsible for setting up the front end with React Bits and HeroUI with user tracking via session cookies, browser user agent and referral parameters which are securely stored in an SQL database.
- Tracking data is visualized using Grafana with graphs of unique users, geoip location, browser, device, referrer, etc.

THE KRAKEN SUMMER SPLASH

Phaser 3 | JavaScript | [Project Details](#)

JULY 2022 – AUG 2022

- Created a popular commissioned project for the client Kraken Rum as a solo programmer.
- Responsible for applying a custom REST API via supplied documentation, secured application through obfuscation and encrypted API payload with AES-128-CBC. Used Node.js and a SQL database through MariaDB for testing.
- Accomplished agile techniques via Trello in a team of 2 ensuring efficient development.

HOBBIES

I mostly play sci-fi space games, I like to self-host services such as Gitea and my portfolio using my own hardware on Linux via Proxmox, I also tinker with Arduino's and Raspberry Pi's.
